FACILITY OVERVIEW

The U.S. Immigration and Customs Enforcement (ICE) Office of Professional Responsibility (OPR) Office of Detention Oversight (ODO) conducted an inspection of the Pine Prairie ICE Processing Center (PPIPC) in Pine Prairie, Louisiana, from March 31 to April 2, 2026.¹ The facility opened in 2000 and is owned and operated by The Geo Group (GEO). The ICE Office of Enforcement and Removal Operations (ERO) began housing detainees at PPIPC in 2016 under the oversight of ERO's Field Office Director in New Orleans (ERO New Orleans). The facility is a dedicated ICE processing center and operates under Performance-Based National Detention Standards (PBNDS) 2011 (Revised 2016).

ERO has detention officers assigned full-time to the facility. They are on-site Monday through Friday, from 8 a.m. to 4 p.m. A facility administrator handles daily facility operations and manages support personnel. GEO provides food services and medical care, and Keefe Commissary Network provides commissary services at the facility. The facility was accredited by the American Correctional Association in November 2023 and the National Commission on Correctional Health Care in June 2020. In August 2024, PPIPC was audited for the Department of Homeland Security (DHS) Prison Rape Elimination Act (PREA) and was DHS PREA certified.

INSPECTION PROCESS

ODO conducts the following annual and biennial oversight inspections of ICE detention facilities to assess and rate each facility's compliance with their contractually obligated detention standards as noted in the Facility Overview section above.

- Dedicated IGSA facility: ODO conducts annual on-site inspections of dedicated inter-governmental service agreement (IGSA) facilities, contract detention facilities (CDF), family residential centers, and service processing centers.
- Non-dedicated IGSA facility:
 - For facilities with an average daily population (ADP) of 50 or more, ODO conducts biennial on-site inspections.
 - For facilities with an ADP of 50 or less,
 - If the facility has not previously had a rated ODO inspection, then ODO conducts an initial on-site inspection, and
 - If the facility has had an ODO inspection, then the facility completes a biennial ODO-assisted self-inspection process (OASIP).
- U.S. Marshal Service (USMS): USMS CDF and intergovernmental agreement facilities complete biennial OASIPs.

In FY 2025, ODO implemented OASIPs, which replaced the annual Special Review inspections ODO conducted at most low ADP and/or short-term use facilities. This new inspection framework is more reflective of the actual operation demand of facilities with a low ADP and/or short-term use. OASIP inspections focus on facility compliance with detention standard requirements that directly affect detainee life, health, safety, and/or well-being. Facilities have 30 calendar days to complete the OASIP inspection, and ODO staff will go on-site for 1 day towards the end of the 30-day inspection window to observe facility conditions, interview ICE detainees, and spot-check the facility's reported findings.⁴

ODO defines a "deficiency" as any violation of detention standards, policies, or operational procedures, as applicable. ODO highlights instances when the facility resolves deficiencies prior to the completion of the ODO inspection as corrective actions. Where applicable, these corrective actions are annotated with a "C" in the *Inspection Findings* section of the report.

Upon completion of each inspection, ODO conducts a closeout briefing with facility and local ERO officials to discuss preliminary findings. ODO shares a summary of these findings with ERO management officials. Thereafter, ODO provides ICE leadership with a final inspection report to: (i) assist ERO in developing and initiating a uniform corrective action plan (UCAP); and (ii) provide senior executives with an independent assessment of facility operations. ODO's findings inform ICE executive management of its decision-making to better allocate resources across the agency's entire detention inventory.

⁴ When ODO conducts on-site inspections for non-OASIP facilities, the facility is notified 4 weeks before the inspection, and ODO is on-site for 2-3 business days conducting the inspection.

DETAINEE RELATIONS

ODO interviewed 42 detainees who each voluntarily agreed to participate. Two detainees declined ODO's request to interview. None of the detainees made allegations of discrimination, mistreatment, or abuse. Most detainees reported satisfaction with facility services except for the concern listed below.

Food Service: Eight detainees complained about the portion sizes, taste, seasoning, and quality of the food served.

- Action Taken: ODO interviewed the food service administrator and reviewed the PPIPC policy including the menus and found a dietitian approved the meals as nutritionally adequate. Additionally, during this inspection, ODO validated the taste, freshness, quality, and smell of the food served and stored.

Funds and Personal Property: One detainee stated PPIPC lost his property during his transfer out of PPIPC for deportation on October 5, 2025. After the airline cancelled his flight, he stated ICE detained him in six different detention facilities before returning him to PPIPC. He also stated he has been in constant contact with ICE regarding his missing property since late 2025 but has not received any information or guidance on what to do if his property cannot be located or returned.

- Action Taken: ODO reviewed the detainee's detention file and found no documentation, to include property receipts noting the detainee's property while at PPIPC. ODO reviewed PPIPC's grievance and request logs and ERO New Orleans' request logs from September 1, 2025, to March 30, 2026, and found the detainee made no reports of lost or missing items. ODO interviewed PPIPC's compliance manager and confirmed PPIPC had no records of missing property nor correspondence from the detainee regarding missing property. ODO found no evidence PPIPC misplaced any property belonging to the detainee; however, during this inspection, ODO identified multiple occurrences of the facility not properly recording, storing, nor maintaining detainees' property. ODO cited these findings as deficiencies in the *Funds and Personal Property* section of this report.

CONCLUSION

During this inspection, ODO assessed the facility's compliance with 28 standards under PBNDS 2011 (Revised 2016) and found the facility in compliance with 19 of those standards. ODO found 32 deficiencies in 9 standards, 22 of which were related to detainee property. Since PPIPC's last inspection in April 2025, the facility's compliance with PBNDS 2011 (Revised 2016) has trended downward. PPIPC went from 1 deficient standard and 4 deficiencies in April 2025 to 9 deficient standards and 32 deficiencies during this most recent inspection. ODO received PPIPC's completed UCAP for its last inspection in April 2025; however, the UCAP may not have been effective in resolving the previous deficiencies ODO cited. ODO recommends ERO New Orleans continue to work with the facility to resolve the deficiencies that remain outstanding in accordance with contractual obligations.
